The screenshot shows the Stack Overflow website with the URL `https://stackoverflow.com/questions/tagged/pandas`. The page title is "Questions tagged [pandas]". On the left sidebar, there are navigation links for Home, PUBLIC, Stack Overflow, Tags, Users, FIND A JOB, Jobs, Companies, TEAMS, and What's this? Below these is a "Free 30 Day Trial" button. The main content area displays a list of questions tagged with "pandas". The first question is "using regex to extract substring from string in Pandas serie [duplicate]" with 0 votes and 0 answers. The second question is "Pandas dataframe returns False even if the values are equal" with 0 votes and 1 answer. The third question is "Python replace NaN values of a field holding numeric values with empty and not single quotes which will be treated later as strings" with -1 votes and 1 answer. On the right side, there is a "The Overflow Blog" section with two articles: "Podcast 289: React, jQuery, Vue: what's your favorite flavor of vanilla JS?" and "How to write an effective developer resume: Advice from a hiring manager". Below the blog is a "Featured on Meta" section with two items: "Question closed" notifications and a "MAINTENANCE WARNING: Possible downtime early morning Dec 2/4/9 UTC (8:30PM...)". At the bottom right, there is a "Custom Filters" section with a "Create a custom filter" button and a "Watched Tags" section with a magnifying glass icon and the text "Watch tags to curate your list of questions."

Python replace NaN values of a field holding numeric values with empty and not single quotes which will be treated later as strings

I am uploading some data frames into snowflake cloud. I had to use the following to transform all field values into string: `data = data.applymap(str)` The only reason I am doing that is that without ...
